

ABSTRAK

Penelitian ini bertujuan untuk mengetahui apakah terdapat pengaruh *Earnings Per Share* (EPS), *Price To Earnings Ratio* (PER), dan *Price To Book Value* (PBV) terhadap harga saham (studi pada perusahaan pertambangan subsektor pertambangan minyak dan gas bumi yang terdaftar di bursa efek indonesia tahun 2017-2019). Pengambilan sampel menggunakan *purposive sampling* dan didapatkan 10 sampel perusahaan dan diambil tiga tahun setiap perusahaan sehingga didapatkan 30 sampel. Teknik analisis dalam penelitian ini menggunakan teknik linear berganda. Berdasarkan penelitian yang telah dilakukan terdapat pengaruh parsial *Earnings Per Share* (EPS) terhadap harga saham, tidak terdapat pengaruh parsial *Price To Earnings Ratio* (PER) terhadap harga saham, dan terdapat pengaruh parsial *Price To Book Value* (PBV) terhadap harga saham. Sedangkan pengaruh *Earnings Per Share* (EPS), *Price To Earnings Ratio* (PER), dan *Price To Book Value* (PBV) secara simultan berpengaruh terhadap harga saham (studi pada perusahaan pertambangan subsektor pertambangan minyak dan gas bumi yang terdaftar di bursa efek indonesia tahun 2017-2019). Hal tersebut menunjukkan harga saham yang terjadi di perusahaan pertambangan sektor minyak dan gas dapat dipengaruhi oleh EPS, PER, dan PBV karena jika terjadi kenaikan pada ketiga rasio tersebut maka akan menyebabkan naiknya harga saham.

Kata kunci : *Earnings Per Share* (EPS), *Price To Earnings Ratio* (PER), dan *Price To Book Value* (PBV), harga saham.

ABSTRACT

This study aims to determine whether there is an effect of Earnings Per Share (EPS), Price To Earnings Ratio (PER), and Price To Book Value (PBV) on stock prices (study on oil and gas mining sub-sector mining companies listed on the stock exchange Indonesia in 2017-2019). Sampling used purposive sampling and obtained 10 samples of companies and taken three years each company so that 30 samples were obtained. The analysis technique in this study uses multiple linear techniques. Based on the research that has been done there is a partial effect of Earnings Per Share (EPS) on stock prices, there is no partial effect of Price To Earnings Ratio (PER) on stock prices, and there is a partial effect of Price To Book Value (PBV) on stock prices. While the effect of Earnings Per Share (EPS), Price To Earnings Ratio (PER), and Price To Book Value (PBV) simultaneously affect stock prices (study on mining companies in the oil and gas mining sub-sector listed on the Indonesia Stock Exchange in 2017 -2019). This shows that stock prices that occur in mining companies in the oil and gas sector can be influenced by EPS, PER, and PBV because if there is an increase in the three ratios it will cause an increase in stock prices.

Keywords: Earnings Per Share (EPS), Price To Earnings Ratio (PER), and Price To Book Value (PBV), stock prices.
