

## ABSTRAK

Penelitian ini mempunyai tujuan untuk mengetahui pengaruh *dana pihak ketiga* terhadap kinerja perusahaan perbankan yang terdaftar di BEI periode 2015-2017, untuk mengetahui pengaruh *capital adequacy ratio* terhadap kinerja perusahaan perbankan yang terdaftar di BEI periode 2015-2017, untuk mengetahui pengaruh *loan to deposit ratio* terhadap kinerja perusahaan perbankan yang terdaftar di BEI periode 2015-2017, mengetahui pengaruh *non performing loan* terhadap kinerja perusahaan perbankan yang terdaftar di BEI periode 2015-2017. Metode penelitian ini menggunakan kuantitatif. Data penelitian yang digunakan yaitu laporan keuangan publikasi perusahaan perbankan yang didapatkan dari web otoritas jasa keuangan (ojk). Metode analisis data yang digunakan yaitu analisis regresi linier berganda, uji asumsi klasik (uji normalitas, uji multikolinieritas, uji heteroskedestisitas dan uji autokorelasi. Pengujian hipotesis yaitu uji t, serta koefisien korelasi, dan koefisien determinasi. Hasil analisis data penelitian ini yaitu DPK tidak berpengaruh signifikan terhadap profitabilitas, CAR berpengaruh signifikan terhadap profitabilitas, LDR berpengaruh signifikan terhadap profitabilitas, NPL tidak berpengaruh signifikan terhadap profitabilitas.

**Kata Kunci : Dana Pihak Ketiga (DPK), Capital Adequacy Ratio (CAR), Loan to Deposit Ratio (LDR), Non Performing Loan (NPL), Return On Assets (ROA)**

## **ABSTRACT**

*This study aims to determine the effect of third party funds on the performance of banking companies listed on the Stock Exchange for the period 2015-2017, to determine the effect of capital adequacy ratio on the performance of banking companies listed on the Stock Exchange for the period 2015-2017, to determine the effect of loan to deposit ratio on the performance of banking companies listed on the IDX for the period 2015-2017, knowing the effect of non-performing loans on the performance of banking companies listed on the IDX for the period 2015-2017. This research method uses quantitative. The research data used is the financial statements of banking company publications obtained from the web of financial services authority (OJK). Data analysis methods used are multiple linear regression analysis, classic assumption test (normality test, multicollinearity test, heteroscedesitity test and autocorrelation test. Testing hypotheses namely t test, and correlation coefficient, and coefficient of determination. The results of this research data analysis that DPK has no effect significant to profitability, CAR has a significant effect on profitability, LDR has a significant effect on profitability, NPL has no significant effect on profitability.*

**Keywords:** *Third Party Funds (TPF), Capital Adequacy Ratio (CAR), Loan to Deposit Ratio (LDR), Non Performing Loans (NPL), Return On Assets (ROA)*
