ABSTRACT

Share price is the price set for a company for other parties who wish to have share ownership rights. The price contained in the letter of ownership of the capital portion is based on market valuation which is influenced by demand and supply on the stock exchange. In general, there are several general factors that can affect the supply and demand for stock prices. These factors resulted in the stock price of the LQ45 Company fluctuating. This study aims to analyze the effect of Return On Assets, Earning Per Share, Current Ratio and Debt to Equity Ratio on Stock Prices in LQ45 Companies in 2019-2021. This research is quantitative with samples that meet the criteria totaling 33 companies. The analytical method used is multiple linear regression analysis. Data analysis was carried out using program assistance (SPSS) version 25. The results showed that Return On Assets and Earning Per Share had a positive effect on stock prices in LQ45 companies in 2019-2021, while the Current Ratio and Debt to Equity Ratio had no effect on Share Prices in LQ45 Companies in 2019-2021.

Keywords: Return On Assets, Earning Per Share, Current Ratio, Debt to Equity Ratio, Stock Price.
