

## **Abstrak**

Perekonomian indonesia saat ini mulai menunjukkan kemajuan di level nasional. Pertumbuhan ekonomi menjadi topik yang dianggap penting untuk jangka panjang dan merupakan fenomena yang berpengaruh di seluruh dunia saat ini. Perkembangan perekonomian ini berpengaruh terhadap pasar modal perusahaan *go public* yang terdaftar di BEI salah satunya adalah perusahaan *real estate* dan *property*. Penelitian ini menggunakan pendekatan kuantitatif dengan populasi sebanyak 67 perusahaan yang bergerak pada sektor *property* dan *real estate*. Sampel diambil menggunakan teknik *purposive sampling*, sehingga didapatkan 39 perusahaan yang memenuhi kriteria, namun berdsarkan hasil uji parsial yang dilakukan peneliti, terdapat nilai ekstrim yang terlalu jauh sehingga terdapat 21 data perusahaan yang harus dieleminasi dari penelitian. Hasil penelitian menunjukkan bahwa *working capital turnover* dan *ratioon assets* berpengaruh terhadap *profit growth*, sedangkan *sales growth*, *inventory turnover*, dan *current ratio* tidak berpengaruh terhadap *profit growth*.

Kata Kunci : *working capital turnover*, *inventory turn over*, *sales growth*, *ratio on assets*, *current ratio* dan *profit growth*.

## **Abstract**

*The Indonesian economy is currently showing progress at the national level. Economic growth is considered a long-term topic and is a phenomenon that is influential throughout the world today. This economic development influences the capital markets of publicly traded companies listed on the Indonesia Stock Exchange (IDX), including real estate and property companies. This study used a quantitative approach with a population of 67 companies operating in the property and real estate sector. The sample was taken using a purposive sampling technique, resulting in 39 companies meeting the criteria. However, based on the results of the partial test conducted by the researcher, there were extreme values that were too far apart, resulting in 21 companies' data being eliminated from the study. The results showed that working capital turnover and asset ratio influenced profit growth, while sales growth, inventory turnover, and current ratio did not.*  
*Kata Kunci : working capital turnover, inventory turn over, sales growth, ratio on assets, current ratio dan profit growth*
